Inland and Coastal Marina Systems provides Conwy Marina with sustainable solution for waiting jetty

Inland and Coastal Marina Systems has successfully upgraded the 'waiting' jetty at Conwy Marina. The new pontoon is now in constant use, providing water users a safe and secure place to wait for entrance into the marina.

Inland and Coastal installed a Continuous Concrete Pontoon (CCP), increasing berthing and load capacity for larger vessels. With greater wave reduction and stability properties, the system also requires less maintenance.

Due to varying water levels between the outer harbour and marina basin, access to the 500-berth marina is via a tidal sill.

"The large tidal range in the estuary here often causes the holding pontoon to ground at low water springs," says Jon Roberts, Conwy Marina Manager. "Inland and Coastal's continuous pontoon design works perfectly. The attention to detail also made the installation process extremely efficient. The work progressed during specific tidal gates without interfering with daily operations and I am delighted with the quality of the new structure."

Jon continues: "Our customers' first impression of the marina comes from their experience on the waiting pontoon. The new pontoon, with its additional safety features and the reangled ramp to give less steep walk ashore access, make me confident that we are giving the best welcome possible."

"Conwy is a stunning part of the coastline," says Oliver Shortall, Inland and Coastal Managing Director. "We were delighted to provide a robust 'waiting' jetty. Our concrete pontoons have double the lifespan of wooden ones. The solid surfaces also offer much better grip properties - especially when wet."

As well as continuously developing pontoon solutions for marina operators, yacht clubs and port authorities, Inland and Coastal is the official UK supplier of SeaBin, demonstrated at the recent Southampton International Boat Show.

Learn more about replacing pontoons, adapting current water access and getting the best, most practical, and sustainable solutions by contacting Jon Challis on 07712 875679 or visiting www.inlandandcoastal.com or at METSTRADE on stand 05.514 in the Marina and Yard Pavilion.
