Typhoon launches new multi-discipline technical clothing range

Typhoon International has launched a new collection of technical clothing, designed to be used across multiple on-water activities.

From keelboat racing, to cruising on sailing yachts, motorboats and RIBs, the new Renvyle outerwear range has been developed to keep the wearer dry and comfortable while afloat, without restricting movement.

The new collection is comprised of two garments, each the result of Typhoon's seven decades of experience in technical marine clothing manufacturer and design, coupled with a thorough understanding of the needs of sailors and watersports participants, at both professional and amateur level.

"We're delighted to launch our new technical clothing range," says Amy Grealish, marketing and communications manager at Typhoon International. "Aiming to be functional, ahead of fashionable, the design with minimal branding and detailing ensures an aesthetic that will never go out of style. Working with the latest fabrics and innovative production processes, the Renvyle range is extremely durable and will stand the test of time."

Garments in Typhoon's new technical clothing range include:

Renvyle Hooded Smock

Typhoon's new spray top, the Renvyle Hooded Smock, is made from two-layer TX-2 fabric and has been engineered to be waterproof, wind proof and highly breathable.

Its ergonomic design, featuring hard wearing adjustable PU cuff seals, saltwater safe trims, and a neoprene waistband with twin side adjusters, offers unrestricted movement as well as extreme durability.

The collar is fleece lined for maximum warmth and comfort, and the stowable hood can be adjusted with a drawcord.

A large front pocket completes the design of this versatile hooded smock.

The Renvyle Hooded Smock comes in black and is available in sizes S – XXL, RRP £89.95

Renvyle Smock

Made from the same two-layer TX-2 fabric as the Renvyle Hooded Smock, the Renvyle Smock offers the same waterproof, wind proof and breathable qualities.

The smock's design, coupled the hard-wearing PU cuff seals and collar and neoprene waistband with twin side adjusters, offers durability and ease of movement.

A waterproof zipped side pocket for essentials completes the design, making it ideal outerwear for all sailors.

The Renvyle Smock comes in black or orange and is available in sizes S – XXL, RRP £79.95

All products from Typhoon's new Renvyle technical clothing collection will be available to view on stand 03.310 at Metstrade (16-18 November 2021). To arrange an appointment to discuss the new range at the show, please contact Amy Grealish on agrealish@oceansafety.com.
