

Wessex Resins & Adhesives to present NEW series of epoxy demonstrations at Southampton International Boat Show

Wessex Resins & Adhesives is set to feature an impressive range of NEW epoxy demonstrations throughout the duration of the Southampton International Boat Show. Visitors can expect an array of epoxy techniques presented daily at stand J401, from the 15th to the 24th of September 2023.

An assortment of technical demonstrations at the stand will provide visitors with the team's specialist knowledge in getting the best out of the WEST SYSTEM® products. Expert techniques and advice will be available.

There is no need to pre-book; the new format of demonstrations will be ongoing daily throughout the duration of Southampton International Boat Show.

Wessex Resins & Adhesives excels in its dedication to customer service and technical support, beginning with the sharing of their distinctive heritage of knowledge and experience. Whatever the epoxy challenge, the chances are that they have solved it before. The technical team will be available throughout the extent of the event to provide advice and support.

This year marked the introduction of a re-formulated product, WEST SYSTEM 207® Special Clear Hardener. An offering of high strength and moisture resistant properties and an exceptionally clear finish. Talk to a team member on the stand to find out more.

The team also welcomes any questions on using PRO-SET® epoxies for composite work and its Bio-Based ENTROPY RESINS®.

An exciting expansion of a new demonstration format leads up to the announcement that Dan Lee Boatbuilding will be joining Wessex Resins for a visual showcase of cold moulding veneer using vacuum consolidation. Additionally, on the stand, Dan Lee will be unveiling his latest work, Temptress. As a working demonstration, Dan will have a ¼ scale model. The full-scale version is available as plans or kit intended for self or professional build using the WEST SYSTEM® product range, including the newly reformulated WEST SYSTEM 207® Special Clear Hardener.

WEST SYSTEM® products have a long-established history and are still acclaimed as the best premier marine-grade epoxy solutions in the industry, backed by over five decades of continuous epoxy innovation and expertise.

“Southampton International Boat Show is a great show for avid boating enthusiasts and also those wanting to get on the water for the first time.” says Ian Oliver, Managing Director, “The WEST SYSTEM® product range we manufacture in Romsey is used by Dinghy builders and for large-scale yacht construction, it is used far and wide by just about every boat yard involved in restoration repair and renovation. Wessex Resins expert team of technical advisors are on hand to provide technical know-how and advice to sailors who want to repair a leak or restore their next adventure that awaits” says Ian.

“All these customers recognise that the WEST SYSTEM product range is unparalleled in what it delivers. They also know that the team is always on hand ready to share knowledge and tips at any given moment, we are readily available by phone, email” says Ian.

Notes to editors

- WEST SYSTEM epoxy was created by Gougeon Brothers Inc. in 1969 and since then the resin and hardener formulations have been continually tested and improved to produce the most reliable and well-balanced epoxy systems available. Wessex Resins manufactures WEST SYSTEM products in Romsey, UK under license from Gougeon Brothers.
- Furthermore, the company is well known for its willingness to share knowledge. Whether projects are large or small, WEST SYSTEM technical publications and videos provide detailed procedures and instructions for specific repair and construction applications. Click to view [here](#)
