

For immediate release

Wessex Resins & Adhesives Joins MAKE UK Defence, Building On Three Decades at the Forefront of UK Defence Manufacturing.

MAKE UK Defence membership marks a new chapter in the company's growing commitment to the manufacturing industry in the UK.

MAKE UK Defence is a not-for-profit organisation committed to supporting the UK defence supply chain and was formed to champion and support the UK's defence supply chain, bringing together the manufacturers and suppliers that underpin it.

Wessex Resins & Adhesives brings more than three decades of technical expertise to the engineering of high-performance epoxy and adhesive systems. With JOSCAR accreditation, DNV certification, and an entirely UK-based development and manufacturing operation.

It's specialist brand portfolio includes WRA, an underwater epoxy range that includes adhesives, primers and putties engineered to cure and perform in submerged and harsh environments.

Alongside WRA is PRO-SET® Epoxy, a specialist brand that began in the marine industry and is engineered for high-performance composite applications, where lightweight, durable and strong composite structures are essential.

Elizabeth Seyffert, Business Account Manager "MAKE UK Defence represents the calibre of organisation we have always aligned ourselves with. Our credentials speak for themselves, but membership formalises our place within a community that is shaping the future of UK manufacturing at the highest level."

Sam Oliver, Managing Director "The connections, industry intelligence, and visibility that MAKE UK Defence provides directly support our strategic ambitions and reinforce our long-term commitment to UK defence manufacturing."

Notes to editors:

- Wessex Resins and Adhesives manufactures WRA, WEST SYSTEM®, PRO-SET® Epoxy, and Entropy Resins® epoxy products in the UK and distributes these via a well-respected distribution network.
